

Internship in Management Consulting

Pharma/Life Science

About IQVIA Consulting Services

IQVIA Consulting Services is the leading consulting firm for the **life sciences industry**. With more than 500 consultants at over 20 international locations we work for the top pharmaceutical and biotech companies worldwide. Our exclusive focus on life sciences, the access to industry-leading proprietary data sources and the long standing expertise enable us to quickly spot and react to current trends and emerging issues, supporting our clients to cope with current and future challenges.

What we offer

We offer students the opportunity to work on the most current strategic topics of the life sciences world in an interdisciplinary and challenging environment. As a member of **international project teams**, you will be **involved in our consulting projects from day one**. You will be helping our clients to develop solutions for critical business issues, bring innovative drugs onto the market and to sustain and grow in a challenging business environment.

What we expect

For an internship, we look for exceptional and ambitious university students from all disciplines in their **4th semester or above** who are interested to join us for **3 months**. Ideally, you already had the chance to gain first **practical experience in consulting or the health care industry** and are involved in further related extra-curricular initiatives.

You convince us with your distinctive understanding of economic and business relations, an **independent and engaged working style** and your **team player capabilities** that allow you to interact confidently in project teams. In addition, you are able to communicate precisely and present your results in verbal and written form. While English is beneficial, **German is mandatory**.

How to apply?

Interested? We look forward to receiving your application including your CV, letter of motivation and transcripts as an e-mail to **recruiting-de@iqvia.com**
